

# Configure Dreamweaver

Use this procedure to configure Dreamweaver CS4 on your laptop

AUTHOR: [MARIO GARON](#)

1. Ask your manager to give you access to the following drives on your computer:
  - TB)-D ( :\\dgsdhrht)
  - PCF-F (:\\dfvdhfdgn)
  - CARD-Ost (:\\fsgesfhs)
2. Let the IT professional install Dreamweaver CS4 on your laptop.
3. Get the Site Definition files and Snippets folder from another technical writer.
4. Import the Site Settings:
  1. Open Dreamweaver and in the menu select Site>Manage Sites.
  2. Click on Import.
  3. Hold CTRL and select the Site Definition files
5. Put the Snippets folder in the Configuration folder:  
C:\Users\\AppData\Roaming\Adobe\DreamweaverCS4\en\_US\Configuration
